

# IAP Mission Uday

## Training Module on Priority Child Health Problems

Indian Academy of Pediatrics

# Emerging Infections and Mental Disorders

## INTRODUCTION

# GOLDEN JUBILEE YEAR OF IAP 2013

Prestigious project IAP MISSION UDAY launched under dynamic leadership of Dr CP Bansal

Aim: Achievement of MDG 4

Empowered health care professionals for evidence-based management of 5 killer diseases

Highly successful and appreciated

Program reached remote areas of the country

1 year

HOWEVER ENDED DUE TO LOGISTIC REASONS

# Need of the hour

Need to do capacity building of health professionals on relevant but less addressed issues like Antimicrobial resistance, emerging infections, adolescent depression, autism, learning disorders and suicide

Need a project with mass appeal and missionary zeal

# Mission Uday

REVAMPED 2019

## Objectives of new MU

Focus on more recent and upcoming challenges in child health

Empower practicing pediatricians in remote corner of the country

Diversifying its parameters to preventive and promotive health

# Objectives of new MU

Practicing pediatrician is able to:

tackle issues of  
antimicrobial  
resistance

Guide & support  
depressed  
adolescents

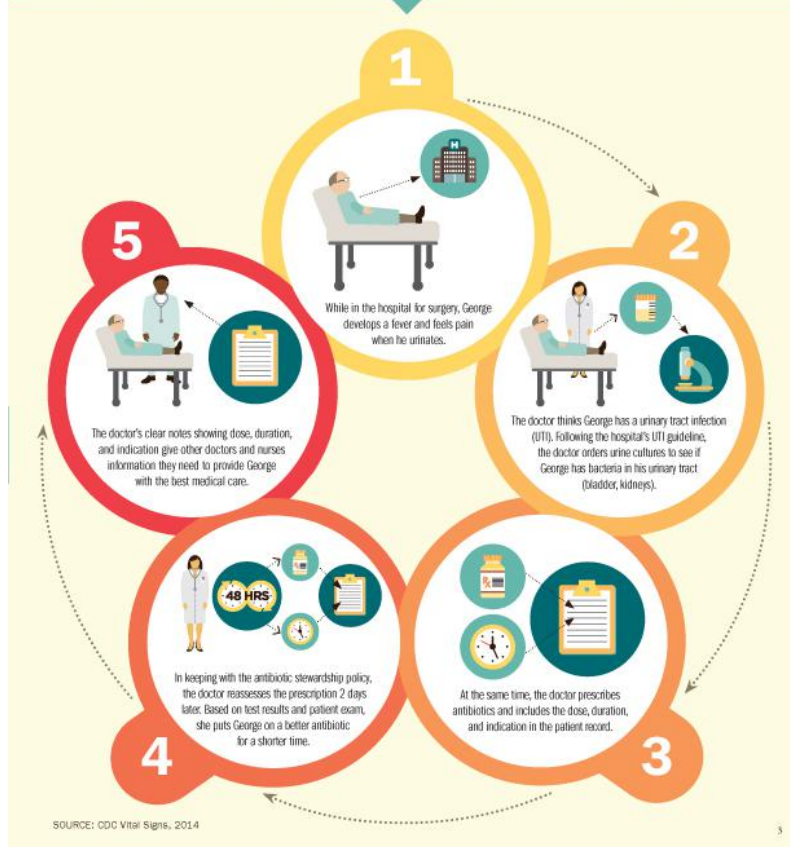

Identify and refer  
Children with  
suspected Autism  
and LD

Enhancing diagnostic and management skills of pediatricians in the hitherto less discussed topics would go a long way in promoting and upholding health of children of India.

# All Hospitals Implement Antibiotic Stewardship Programs

## Improving antibiotic prescribing in hospitals

Key moments for improving the cycle of antibiotic prescribing practices
