

IAP PEDIATRIC PALLIATIVE CARE COURSE 2021

ACADEMIC PARTNER

WHO IS IT FOR?

General, specialist paediatricians and pediatric residents who care for children with life threatening and/or life limiting conditions.

WHAT ARE THE REQUIREMENTS?

The Basic Course (starting 13th November) will cover 12 topics. There will be weekly sessions on Saturdays (3 pm to 4.30 pm). The course requirements are: 80% attendance and 70% correctly filled out post test questions. Those who complete the requirements will be awarded a certificate from the IAP.

WHAT WILL YOU LEARN?

This course will be conducted by renowned specialists in palliative care helping participants with practical tips on :

- How to identify children who need Pediatric Palliative Care (PPC) in these life limiting conditions
- Management of pain and prevention of procedural pain
- Role of palliative care in managing GI symptoms and Respiratory and Cardiac symptoms
- How to approach a child with Neurological symptoms
- Demonstrating how children can be included in information sharing and decision making with regard to their care
- Managing ethical challenges in PPC
- Communicating with children based on their age/ development stage on death and the illness experience
- Caring for the adolescents requiring palliative and supportive care
- Caring for neonates requiring palliative care
- Caring for end of life paediatric patients
- Implementing palliative care in your setting
