Editor's Note

Dear colleagues,

This October issue of Child India, first and foremost, takes the opportunity to congratulate all the elected office bearers and EB members and also those who participated sportingly in the democratic exercise this year. Kudos to the election commissioners, the contestants and to all IAPIans for the smooth conduct of the IAP electoral process that ensured a record number of voters exercised their franchise. We are hereby positioning our Academy as a model for all other associations to emulate. Congratulations.

Sept 28th to August 4th was marked with awareness campaigns in IAP for Antibiotic Awareness Week harping on the theme 'Antibiotics: handle with care' Do send in an activity report of action for the week to IAP CO on or before Nov 30th.

October was first declared as National Domestic Violence Awareness Month in 1989. Since then, October has been a time to acknowledge domestic violence survivors and be a voice for its victims.

October is Down Syndrome Awareness Month, a chance to spread awareness, celebrate people with Down syndrome and make people aware of their abilities and accomplishments. It's not about celebrating disabilities, it's about celebrating abilities.

October 6th was World Cerebral Palsy Day - movement of people with Cerebral Palsy and their families, and the organisations that support them - with a mission to ensure that children and adults with CP have the same rights, access and opportunities as anyone else in our society.

Oct 10th is World Mental Health Day - Theme - "Greater Investment - Greater Access.". The day aims to raise awareness regarding mental health issues and mobilize efforts to support mental health.

October 11 is celebrated as the International Day of the Girl Child - Theme - "My voice, our equal future", to recognize girls' rights and the unique challenges girls face around the world and World Obesity Day - Theme - "The roots of obesity run deep'.

World White Cane Day is celebrated every year on October 15 to recognise the movement of the visually impaired from dependency to active participation in society and celebrate their achievements.

Wish you all had a great October,

Jai Hind! Jai IAP!

Dr Jeelson C Unni
Editor-in-Chief

President's Message

Dear friends and colleagues,

I am glad to say that despite the severe disruption caused by the COVID crisis and the lockdown, we have progressed well with the dIAP initiative against all odds. This note is an update on some fundamental elements of the initiative.

1. Professional Education - Reaching the unreached with complete pediatrics education

a. DCOE - Certificate Courses and Modules

The subspecialty chapters have recommended over 700 topics across 17 plus subspecialties.

The dIAP academic council is organizing the topics and modules for all subspecialties to ensure content across all areas of pediatrics. This activity is under the guidance of Dr. Dheeraj Shah.

Recording and editing lectures are proceeding at a fast pace of 20 per week, and we have already completed the preparation of 250 professionally edited lectures.

We expect to meet our target of publishing over 500 topics, covering 40 plus modules by December 2020 and 700+ topics and 100+ modules by March 2021. Each module will be published along with pre-tests and post-tests with an online certificate for completion.

b. DCOE - Annual dissemination plan

We are creating an annual dissemination plan for 70+ modules for the next year under Dr. Piyush Gupta's leadership. The annual plan for each module includes a few national webinars for trainers and over 100 local events conducted by regional and local chapters of IAP. These include workshops, online case study clinics, RTMs, etc. Many locations will also find support for additional physical classroom sessions when the pandemic concerns go down.

These annual plans will ensure academic activity across the country, distributed rationally by geography and topics covered. We are laying the ground for 2021 to see well planned and organized academic training at a never before coverage and reach in IAP history.

President's Message

All our members will be able to plan their annual academic calendars well in advance and participate.

c. DCOE experience and activity

We have conducted over 1000 academic events so far, and total attendance has exceeded 2 million. We can confidently say that we now have the experience to reliably deliver education support for the extensive nationwide programs planned for 2021. This acquired expertise is for online education, hybrid education (online plus offline), and offline classroom education supported by high-quality IAP recorded content.

Our industry support program is maturing fast. We have successfully conducted most events, and cross-subsidized these events' costs by income from a few (about 10%) supported events. We expect to successfully support the nationwide programs planned for 2021 using the same model.

d. DCOE and ICP

Experience and capabilities gained with DCOE will accelerate the formation and support for a vibrant, fully functional ICP.

We look forward to supporting Dr. Piyush Gupta to add this further outstanding achievement of establishing ICP in 2021.

2. Conferences

We have established a conference platform and capabilities to conduct conferences of varying degrees of complexity with 3-D conference layouts.

This platform has already conducted five regional Pediweeks so far, with more planned in the coming months and a national Pediweek in December.

This platform development has, however, come at an unplanned cost to the dIAP program.

Besides, each conference requires custom work and additional charges. We are in the process of covering up those costs from other available budgets to ensure that dIAP core programs remain unaffected. We have also put in a policy whereby the minimum customization costs are paid for future conferences.

President's Message

3. dIAP Point of Care Program

I am delighted to say that a pilot program in cooperation with NSDL eGovernance Limited, National Cancer Tissue Biobank of IIT Madras, and other institutions starts in November. A successful pilot will help us make the services available to all our members in 2021 to benefit 100 million children treated by our 32,000 member pediatricians.

Under the pilot program, the services are the following, with direct leadership and advice from Dr. Piyush Gupta (and his nominees) for cancer, inborn errors of immunity, and nutritional assessment and advisory program.

- Catch Pediatric Cancer - CPC - Enable early diagnosis of pediatric cancer. 70% of these cases do not get diagnosed early today.
- Spot Inborn Errors of Immunity - SIEI - Enable early diagnosis of Pediatric Immunodeficiency. 95% of these cases do not get diagnosed early today.
- Nutrition Assessment and Advisory Program - NAAP - Enable nutritional assessment and advisory services to patients of all pediatric clinics. 90% of all children have some nutritional deficiency.
- Behavioral and Neuro Development Program - BND - Enable developmental assessments and developmental programs to special needs children. 10% of all children have special needs.

We are also planning to include a Tuberculosis program.

The clinics will also get an IAP owned Practice Management and Diagnostic Support System with a virtual clinic & telemedicine, extending the clinic to its patients. This is supported and secured by India's leading eGovernance and Citizen Data Security company - NSDL eGovernance Ltd. (PAN, TIN, GST, Aadhar, etc.)

In the coming months and in 2021, the continued close working partnership, this jugalbandi between Dr. Piyush Gupta and myself, supported ably by Dr G V Basavaraja will deliver success to IAP on these nationally important solutions to enhance pediatrics in India.

Yours sincerely,

Dr. Bakul Jayant Parekh

President IAP 2020

Secretary's Message

My dear beloved members,

Hope this letter finds you well.

I am proud to be a part of an organization that not only gives knowledge back but allows friendships to be created within the industry. It's my pleasure to announce that we are continuing with our regular National webinars which were being conducted between 2 PM - 3.30 PM & 4 PM - 5.30 PM. It has been a huge success and we wish to continue the same.

Following the footsteps of some great leaders, we are happy to share that we were able to successfully conduct a physical board meeting in Goa as promised amidst COVID19. This was possible only through the cooperation, confidence, and support shown by our members.

Yet another fabulous news to be proud of is the recent elections that happened in IAP. I must and should congratulate and thank election commissioner Dr.N Gnanamurthy, Dr Rajendra Vaidya, Dr Ashwini Kamdar, Dr Arup Roy, and Dr Durgaprasad Paleti for the tremendous job done and for conducting a smooth run of elections. Happy to witness the increase in the percentage of voting. I heartily congratulate President-elect - Dr. Remesh Kumar, Vice Presidents - Dr Major Dr Nagaraj, Dr Sangeeta Yadav, Dr Jayant Updae, Dr Ravi Kumar, Dr Athanu Bhadra and all the executive board members under the leadership of Dr. Piyush Gupta. I welcome the vibrant team of 2021 and look forward to working with you all.

This association has a wealth of knowledge. Having said that, we are glad to mention that we have an international speaker on board for academics for the month of December. Request you all to participate in huge numbers and I assure you that the session is going to be an amazing one.

Last but not the least our Visionary President-Dr Bakul Jayant Parekh, dear colleagues and friends: Let us reflect on our shared responsibilities to our association at the grassroots level, and together let us fulfill this dream.

Be safe and keep everybody safe around you.

Together Let's Build IAP.

Jai Hind! Jai IAP!

Sincere Regards,

Dr G V Basavaraja

Honorary Secretary General 2020-21

recovery rate tally 1.56 lakh

Patna. Upcoming elections, festivals and more economic activities as the lockdown restrictions are eased may further add to the rising number of Covid-19 cases in Bihar if proper precautions are not taken, say health experts, who expect cases to rise substantially, especially by the end of October.

The data shared by the health department shows Bihar registered 1,700 cases daily on average so far this month. This is nearly a thousand less than the number of cases reported daily in August when the average per day figure was around 2,500.

As for the projected figure by the end of September and October, AIIMS Patna nodal in-charge for Covid-19, Dr Sanjeev Kumar said, "By the end of September, it will be established that close to 20% of cases require proper monitoring and early intervention to reduce mortality. There is a possibility that in the coming weeks, as the lockdown restrictions are eased, there will be a rise in cases from Covid-19 because of potential underlying comorbidities, such as hypertension, cardiac problems, bronchitis and asthma. Hence, even though civic activities have resumed, I am worried a lot.

"I cannot risk the lives of my children. I am not sending them to school before a vaccine comes out, come what may," said Shiv Narayan, a resident of Patel Nagar in the city.

By the end of Sept, the figure will remain same. However, by the end of October it may go up to 2,500 cases on an average every day

DR SANJEEV KUMAR
AIIMS-Patna nodal incharge for Covid-19

deaths. So this has to be kept in the mind that testing and other health facilities are not interrupted because of the election," said Dr Arun.

However, Covid-19 nodal officer at JLNMC, Dr HS Sharma had a different view. Dr Sharma said he was not expecting any increase in the number of cases now, as the peak has been crossed. "It is very difficult to say now, but one thing is clear that those who had to follow the preventive rules were following in

Girls wear masks in Patna

may increase in October. Citing the increasing trend across the country, especially in rural areas, he said, "If cases continue to grow in the rural areas, then the condition may deteriorate even for Bihar. At such places, people do not have adequate health facilities."

Patna: Patna topped the state top (JEE) Main, the unced by the No day. He scored AIR 37.

In girls' category the exam in the engineering was held from Se candidates back.

Shubh, a student School in Patna, board exam this the prestigious
