Editor's Note

Dear Colleagues,

We started the month with the World Breastfeeding Week with multiple awareness programs highlighting the need for promotion of exclusive breastfeeding for the first six months of life. This involves coordinated activities and policies to promote health among women, newborns and infants through breastfeeding. Currently fewer than 40% of infants under six months of age are exclusively breastfed worldwide. We, as an Academy working towards optimal health and development of children of our country, must leave no stone unturned in increasing these numbers and ensuring initiation of best practice complementary foods after the 6th month while continuing breastfeeding for up to two years or beyond.

All IAP programs for the year are going ahead at full steam. IAP, through the untiring efforts of Dr Bakul Parekh and his OB and EB, are increasingly being recognised for their efforts in actively propagating e learning through this media.. Most IAP branches are also conducting webinars to introduce national and international stalwarts to their members and this tsunami of useful information should improve the standard of care of children of our country.

India's overall coronavirus case tally has crossed the 33-lakh mark with a death toll of 60,472. How safe are India's children from COVID-19? The experts in IAP have been and will continue to study and deliberate on recommendations for managing and preventing COVID 19 in our country's children. We as pediatricians need to keep abreast with these regular updates.

The IAP elections are round the corner. Please ensure that each one of you exercise your franchise to elect the 'ideal' candidate, in your esteemed opinion, who could make our Academy stronger, inclusive and child and pediatrician friendly.

A special August wish to all,

Regards,

Dr Jeelson C Unni
Editor-in-Chief

President's Message

Dear friends and fellow academicians,

Season's Greetings !

This year has been a year of firsts for IAP. It started two years ago, when you all elected me as the President elect of our mother organization IAP unopposed – first time in the history of IAP in last four decades. This shows faith and affection you all have for me and honestly that has left me greatly humbled. It motivated me to go extra mile to achieve the best for our mother organisation IAP. I had a vision which would change the way that our medical fraternity works and benefit many fellow pediatricians who are generally practicing in the remote locations and rural areas. dIAP platform – a technology driven academy was established for the first time. With dIAP we are reaching the unreached taking whatever IAP has to offer to each and every corner of our country and beyond. It has no boundaries.

None of us were prepared for what happened next. COVID19 struck – a pandemic of global proportions happening after nearly a century! The world plunged into despair. Before the financial year completed, India was forced into a lockdown situation. World came to a standstill. Economies crashed, academics became a secondary requirement – survival was of utmost important. The whole world was brought to its knees. We, the Doctors and healthcare industry started working overtime, trying to prevent the spread and find a cure, so as to help people survive. This was the time for IAP to come to the rescue of members and community and continue it's academics, social and community activities. No one knew what to do. Desperate times called for desperate measures. We had to start thinking of different ways and so called “new norms “ . IAP took up this challenge and launched the dIAP program - a program which aimed to ensure that all pediatricians got their updates well in advance. The dIAP team was already working quite hard .Now they needed to pull up their socks and ensure that they could deliver well before the expected timeline. I am happy to say that IAP was amongst the first organizations to start the webinar concept on such a large scale. It was and still is hugely popular. People all across the country have started viewing and absorbing the knowledge shared in these webinars. Knowledge wasn't only limited to Covid19 and other academic topics, but rather a holistic approach was taken to ensure the best interests of our members requirements like teleconsultation solution, health and death insurance, medicolegal support, Covid guidelines, connecting with government,

President's Message

charitable and social responsibilities and so on. Even today, IAP leads the system by having numerous webinars in its belt. The biggest plus points being that they could view the webinars at their own convenience. It also gave them the flexibility to attend to their duties and then proceed to get to arm themselves with the latest knowledge in their free time. No wonder we have had more than 500 webinars covering all the subspecialties with over 1 million views till date. And all these webinars are recorded and archived as a huge library for future reference. Parental webinars is another first answering the unanswered questions in parent's mind. Again as a first, We had a number of virtual meetings - whether administrative or otherwise. By now we have conducted 4 EB meetings, six subcommittee meetings, and six OB meetings in last 8 months addressing various issues satisfactorily in time. On a lighter note, it was also the first time that people have stayed at their own homes 24x7 for such a long time with their better/bitter halves. It gave people time to engage in activities that and hobbies that they had left due to their professional/social commitments.

The next thing in this order was the Zonal pedicons - which was designed to increase the local zonal participation during such conferences. Since we could not meet physically, the dIAP team has worked tirelessly to create this virtual event for us that too in a 3 D format for the first time. Thus, ensuring the safety of every colleague while ensuring a memorable experience. I hope that IAP will continue to utilize this mechanism of science dissemination for years to come.

All this would not have been possible without the guidance of my seniors as well as all of the Office Bearers - Dr. Piyush Gupta and Dr. G.V. Basavaraj in particular - who have stood like a rock and not only helped me in achieving the vision I dreamt for IAP, but also helped me immensely along the entire way. A huge thank you to all of you, my friends and colleagues. Even though I am not taking each and everyone's names here, please understand that achieving this huge dream of mine would not have been possible without your support. I hope that I have helped our mother organization reach a level higher than it was before, but I want you all to realize that this was only possible because of all of you. I am truly grateful to the Almighty to have made me a part of such a strong, vibrant and helpful family.

Jai Hind, Jai IAP

Dr. Bakul Jayant Parekh

President

Secretary's Message

Dear Colleagues

“Successful and unsuccessful people do not vary greatly in their abilities. They vary in their desires to reach their potential.” - John Maxwell

I hope this message finds you in good health. I know this part of the year is overwhelming for all of us & require serene, salubrious, and sublime environment for attaining excellence. We have all been positive and our approach towards the yield is positive and this is the start of a great road ahead.

First of all, I wish all my Kerala and Malayali friends a very Happy Onam. I wish you joy and good health and may you always enjoy the bounty of nature!” “May King Mahabali bless you with good health and happiness. May all your hopes, dreams, and wishes come true.

Indian Academy of pediatrics has been moving forward and like every other month has been involved in various academic, cultural & sports activities, keeping the journey going. Zonal Pedicon has been launched and has been driven under eminent leaders whose approach is reluctant. East zone under Vice President- Dr. Nigam Prasad Narain, Central Zone under Vice- President Dr. Sudhakar, Dr. Radhalrishna Kandala, North Zone under Vice President Dr. Anand Vasudev, Dr. LN Taneja & Dr. Deeraj Shah has taken off in a great way.

The Zonal Pedicon not just focuses on academics but also on cultural activities, sports & Yoga as well. The quiz session for graduates & Post graduations is the highlight. I congratulate each one of you for having put up a great show and look forward to the same enthusiasm to continue.

Yet another subject of importance is the HIV program by IAP along with UNICEF & WHO to create awareness among pediatricians, parents, and teachers on HIV risk reduction & prevention. This is marked a safe and healthy life for every kid. Kudos to that.

We are happy to announce that the 10th Democratic Elections of IAP has been declared and will start from 10th September and I am sure that this will go on smoothly under the guidance of our chief election commissioner Dr. N Gnanamurthy and team. I wish all the candidates all the very best and hope that you will all continue the good work.

Last but not the least I thank all my executive board members, office bearers, and all the loved members for your never-ending fervor, warmth & passion.

IAPians, be safe, and keep everybody safe around you.

Together Let's Build IAP.

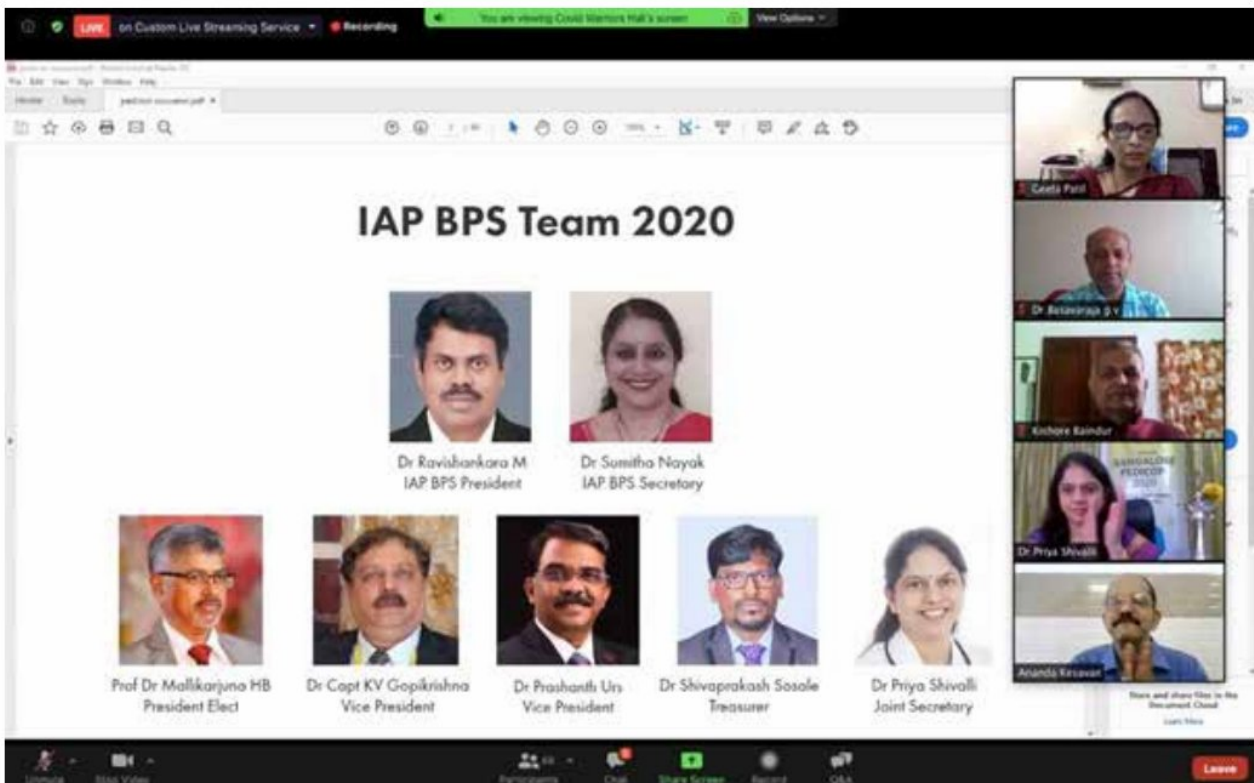

Jai Hind! Jai IAP!

Sincere Regards,

Dr G V Basavaraja

Honorary Secretary General 2020-21
