Editor's Note

Dear friends,

Greetings from Child India - post the mega IPAPEDICON held at Gandhinagar.

On February 13th we celebrated the International Epilepsy Day focusing on the theme "Stigma" realising that dealing with the stigma of epilepsy is more difficult for the patient and their families than the disease per se.

February 14 was Congenital Heart Defect (CHD) Awareness Day. This special day comes at the end of CHD Awareness Week (February 7-14) — a time to raise awareness about CHD, the most common type of birth defect.

International Childhood Cancer Day (ICCD) is observed on February 15 every year. The three-year campaign for International Childhood Cancer Day began in 2021 and will conclude in 2023. The theme for the three-year campaign is 'Better Survival'. The campaign is part of the effort to reach the target goal of the WHO Global Childhood Cancer Initiative to achieve at least 60 percent survival for all children diagnosed with cancer around the world by 2030.

On February 28th the World Rare Diseases Day encouraged us to "Share your colours" and "Light up for Rare" and in accordance to this theme Child India, February issue, deals with the approach to Inherited Metabolic Disorders.

Happy reading,

Regards and wishes for a great year of IAP activities..

Jai IAP

Dr Jeerson C Unni

Editor-in-Chief

President's Address

Dear All,

In this February issue of Child India we are discussing about treatment of inborn errors of metabolism (IEMs) which may present at any age (antenatal, birth, infancy, childhood or adulthood), with symptoms that range from abrupt in onset and episodic to chronic and progressive. Poor feeding, vomiting, failure to thrive, lethargy, delay or regression of milestones, acidotic breathing, hyperammonemia, hypoglycemia, seizures, ataxia, seizures, coma, fulminant hepatoencephalopathy and/or decompensation out of proportion to what would be expected from intercurrent infection should ring alarm bells.

IEMs are rare genetic (inherited) disorders in which the body cannot properly turn food into energy. They are categorized as disorders of carbohydrate metabolism, amino acid metabolism, organic acid metabolism, or lysosomal storage diseases. Over 1000 inherited disorders caused by mutations in genes coding for proteins that function in metabolism have been identified. Most of the disorders are inherited as autosomal recessive, whereas autosomal dominant and X-linked disorders are also present. Few of the IEMs are

Phenylketonuria (PKU)

Galactosemia (GAL)

Maple Syrup Urine Disease (MSUD)

Fructose intolerance

The estimated incidence of IEM is 50/100,000. This translates to nearly 10-12000 infants and children in our country who need specialized nutrition and medical attention. Our country also has a high prevalence of consanguineous marriages which gives an indication to the possibility of high occurrence of IEM.

Early diagnosis of these metabolic disorders will certainly help in preventing the irreversible complications and significantly improve the long-term prognosis, by early treatment. Knowledge, information and availability of specialized products for the treatment of many metabolic disorders which can present with nutritional emergencies is essential, for the affected child to survive and thrive. Awareness and implementation about Neonatal screening tests coupled with prompt institution of the specific treatment will go a long way in management of many metabolic disorders.

Happy reading,

Dr Upendra Kinjawadekar

National President 2023

Indian Academy of Pediatrics

Secretary's Message

Dear Friends,

"A team that works together, stays together and finds greatness together."

The month of February began with finalizing and consolidating all the necessary preparations for the iconic 30th IPA Congress and 60th IAP Pedicon 2023, which have been going on for the last 2 to 3 years.

The 30th International Pediatric Association (IPA) Congress and 60th Annual Conference of the Indian Academy of Pediatrics (IAP) was held from February 19th to 23rd, 2023, at the Mahatma Mandir Convention and Exhibition Centre in Gandhinagar, Gujarat, India. Shri Bhupendra Patel, Hon. Chief Minister of Gujarat, inaugurated the conference, and Shri Mansukh Mandaviya, Hon. Health Minister, Government of India, gave a virtual address at the inauguration. This event brought together pediatricians, researchers, and healthcare professionals worldwide to discuss the latest advancements in pediatric care, research, and education. Over 800 distinguished guests graced the conference, including renowned speakers, Editors, and representatives from Govt. of India MOHFW, Govt Authorities from other countries, and senior health authorities.

On behalf of the IAP Executive Board 2023, I would like to thank every organising committee member of the 30th IPA Congress and 60th IAP Pedicon 2023 for their healthy hospitality at Gandhinagar, Gujarat. I appreciate the spirit of each team member. The teamwork displayed during the entire event was exemplary and Commendable. I was thrilled to see such a terrific group working in tandem. We appreciate your performance and look forward to more events in future.

Also, on the 18th of February, 2023, we held a meeting of the Executive Board. Various activities for the health and welfare of the child were discussed in this meeting, and some decisions have been taken in this regard. I thank all Office bearers and Executive Board members for their active participation and fruitful discussion in the best interest of child health.

We have also successfully conducted meetings of Indian College of Pediatrics, IAP Subspecialty Chapter and Groups, IAP State/ Local Branches Office Bearers, Editorial board of Indian Pediatrics and Indian Journal of Practical Pediatrics, UG & PG Quiz Committee, ECD Committee in February during IAP Pedicon and IPA Congress 2023.

Regarding the ECD, A total of 119 workshops of ECD have been done to date and 2 workshops of ECD in February 2023. This month total of 76 Basic NRP and 14 Advanced NRP provider courses have been successfully conducted.

On behalf of IAP, I urge you to organize various activities in the best interest of the health and welfare of the country's children.

Long Live IAP, Jai IAP

In service of Academy,

Dr Vineet Saxena

Hon. Secretary General 2022 & 23

30TH IPA CONGRESS & 60TH DIAMOND JUBILEE PEDICON 2023

President's Engagements

President's Engagements

President's Engagements

Global meeting on zero dose children and routine immunization recovery organised by Rwanda Pediatric Association under the aegis of IPA and in collaboration with unicef was held on 30-31/1/2023 in Kigali Rwanda. Along with me representing Indian Academy of Pediatrics there were 20 other country pediatric society officials present. They included our Asian neighbours like Pakistan, Indonesia, Philippines and many African countries like Niger, Nigeria, Kenya, Uganda, Senegal, Ivory coast etc. Presence of Ukraine representative was noteworthy and listening to their experiences of the last one year was extremely disturbing. IAP stands committed to fulfill the immunization agenda 2030 as we are very well aware that missing out on these vulnerable children will not only make them susceptible to many VPDs but will adversely affect their growth trajectory and outcome over the life course. After discussing the bottlenecks in the issue on the first day, the following day group focused on solutions to address these issues. A compilation of all these doable solutions will soon be made. As Zero dose children is a marker of communities with multiple deprivations, IAP strongly advocates equitable access to essential health care. I congratulate Dr Naveen Thacker, Unicef and Rwanda Pediatric Association for taking this initiative and thank them for inviting IAP for the meeting.

President's Engagements

Sunday the 5th to Sunday the 12th I was fortunate to attend 4 mega events! First was the grand installation of Delhi IAP team where Dr Anurag Agarwal took over as President. Dr Mukesh Verma as secretary, Dr Alok Bhandari President Elect and Dr Ajay Gupta Vice President organized a glittering function in the presence of who's who of Delhi IAP along with our dear HSG Dr Vineet Saxena. Friday the 10th was the 20th anniversary of Dr Samir Dalwai's New horizons child development center in Mumbai. It was an altogether different experience watching the specially abled children perform and their parents sharing stories about Samir's contribution in shaping their kids life. Dr RD Potdar, Dr Rashid Merchant, doyens of pediatrics also blessed the function. Mrs Supriya Sule MP addressed the gathering virtually from the steps of the parliament.

Saturday the 11th was the installation function of IAP Raigad; geographically most widespread? branch of IAP which has over the years contributed immensely in every IAP program. Dr Vikas More took over as President with Dr Ajay Koli as secretary. Visiting such smaller yet most sincerely working branches is extremely gratifying.

Sunday 12th February was the annual conference of IAP Navi Mumbai - titled FLIRT (Focused learning- ideation-rational thinking) apart from the brilliant academic sessions the highlight of the function was felicitation of some fitness freaks of the branch. IAPan Dr Pravin and Dr Arti Gaikwad are inspiring countless pediatricians and the number keeps increasing. Dr Satish Shahane, Dr Mangai and the team NMAP are leading the branch with same enthusiasm as their predecessor Dr Jeetendra Gavhane.

President's Engagements

Sankalp: Sampurna Swasthya pilot was run in St Xavier's school Gandhinagar on 22nd February for standard 8 and standard 4. Dr Rekha Harish, Dr Deepak Pande, Dr Sandeep Kelkar, Dr Anil Sud, Dr Anju Virmani and Dr Upendra Kinjawadekar interacted with the students. EB colleague Dr C Nirmala also attended the program.

Very encouraging response from the students, teachers and the Principal of the school.

President's Engagements

Prime Minister

MESSAGE

It is heart-warming to learn about the 30th International Pediatric Association Congress (IPA 2023) and the 60th PEDICON being held at Gandhinagar. That India is hosting the IPA after a gap of four decades enhances the pride and honour associated with the meeting.

The theme of the meeting – “Quality Care for Every Child Everywhere” reflects our vision and mission. The field of pediatrics, in particular, is of crucial importance. Children are the future of the nation and on their health and wellness depends the overall health of our country.

Pediatricians are among the first professionals that children interact with regularly. The competence, professionalism, friendliness and service-mindedness of pediatricians play a role in sowing the seeds of service in their minds. This is both a great privilege and a responsibility.

Good health and well-being are central to the nation's progress. During the last few years, the nation has focused on making holistic healthcare accessible, affordable and available for all.

India has been running the world's largest immunization programme under Mission Indradhanush, which has won plaudits from across the world for raising immunization coverage significantly by reaching even remote areas. This has protected crores of mothers and children.

From upgrading healthcare network at every level to providing nutrition to impact child health positively, we remain steadfast in our commitment to make our healthcare systems work for our children. Our focus is also on making our systems future-ready.

In this context, this assembly of national and global pediatric experts presents an opportunity to share the latest and best practices, as well as devise a futuristic strategy to treat various children-related ailments, diseases and disorders. This is crucial for the healthy future of the world.

Best wishes for result-oriented deliberations at the 30th IPA 2023 and 60th PEDICON.

(Narendra Modi)

Hon Prime Minister Sree Narendra Modi's message for IPAPEDICON 2023

Metabolic Disorders

Inherited Metabolic Disorders -

Basic principles of treatment

1. Prevent catabolism - Administration of calories used in acute episodes to slow down catabolism. A poor intake of calories can contribute to poor metabolic control just as much as an excessive intake of the offending substance.

2. Restrict the intake of the offending substance - if possible, through manipulation of the diet.

3. Increase excretion of toxic metabolites - by using alternative pathways. For example, carnitine is useful in the elimination of organic acids in the form of carnitine esters. Sodium benzoate and phenylacetate are useful in treating hyperammonemia.

4. Increase the residual enzyme activity (if possible) - administration of pharmacological doses of the vitamin cofactor for the defective enzyme. If the binding constant for the vitamin has been altered and the enzyme is otherwise reasonably functional, increasing the vitamin concentration will increase enzyme activity via a mass action effect.

5. Specific Management: Dietary therapy, Enzyme replacement Therapy, Transplantation, gene therapy - may cure many IMD, but irreversible brain damage may have occurred before there is an opportunity to use these therapies.

Management Guidelines depends on presentation

A) Inherited metabolic disorders - Acute Intoxication

Prototype disorders

1. Restrict protein: Restrict protein intake totally until the crisis is over, but usually no longer than 48 hours. Slowly reintroduce at 0.25 to 0.5 gm/kg and gradually increase to prevent catabolism of endogenous protein

2. Special amino acid mixture if available-as for MSUD, Propionic acidemia

3. Ensure adequate caloric intake with intake of high carbohydrate: diet or IVF-hyperosmolar glucose through central venous line; add intravenous lipids if necessary

Glucose 15-20g/kg/day

Add fat 2g/kg/day

Always add Insulin starting with 0.05unit/kg/hr

Useful combination is 1 unit of Insulin/8gms of glucose

Adjustments are made depending on blood glucose

4. Detoxifying medications:

a. Urea Cycle Disorders - Benzoate, phenylacetate, arginine, citrulline as needed. [See in treatment of hyperammonemia]

b. Organic acidemia - Carnitine

5. Targeted cofactor therapy

a. Propionic acidemia - Consider Trial of Biotin in all cases

b. Methylmalonic acidemia - Vitamin B 12

c. Glutaric acidemia - Riboflavin in high doses [200-300mg/day]

6. Treatment for any triggering infection should be started as appropriate.

7. Because of potentially severe metabolic stress caused by fever, temperatures in excess of 37.8o C should be treated aggressively with acetaminophen, and if necessary, ibuprofen. Use a cooling blanket if necessary

8. Avoid constipation in Urea cycle disorders and organic acidemia - Use Lactulose to ensure 2-3 stools per day. May give bowel wash early before Lactulose starts acting.

9. Oral antibiotics - Metronidazole for gut sterilization in urea cycle defects and organic acidemias

B) Inherited metabolic disorders - Acute acidosis

1. Adequate hydration.

2. Fluid bolus-IVF containing 75-150 mEq of isotonic NaHCO₃ [75 for massive ketosis; 150, if in coma or HCO₃ is less than 10 mEq/L]

3. Forced diuresis with large amounts of fluids and frusemide is successful in methylmalonic aciduria for removing methylmalonate from the body

4. Check acid base, electrolyte status every 6 hours

5. For organic acidemia - Carnitine therapy-

a. Oral less well tolerated - give up to 100 mg/kg/d

b. IV infusion daily 100 mg/kg/d

6. For Isovaleric acidemia - Glycine 500 mg/kg – Promotes excretion of isovaleryl glycine

C) Inherited metabolic disorders - Hyperammonemia

Prototype: Urea cycle disorders & Organic acidemias

1. Restrict protein intake and supplement enough glucose and calories

2. Na Benzoate: Loading dose 250 mg/kg over 1-2 hrs.

Daily dose [IV infusion] 250-500 mg/kg

3. Na phenylacetate: 250 mg/kg over 1-2 hrs.

Daily dose [IV infusion] 250-600 mg/kg

4. Na phenylbutyrate: 250 mg/kg over 1-2 hrs.

Daily dose [IV infusion] 250-600 mg/kg

5. L-Arginine: [In Urea cycle disorders only].

In ornithine transcarbamylase (OTC) deficiency/ carbamoyl phosphate synthetase (CPS) Type 1 deficiency - 250 mg/kg over 2 hrs. Daily dose [IV infusion] 200-250 mg/kg.

In citrullinuria & ASA deficiency - 600 mg/kg over 2 hrs. Daily dose [IV infusion] 600 mg/kg.

Arginine is contraindicated in Arginase deficiency

6. Carnitine 50-100 mg/kg loading and daily infusion

7. Ammonia levels > 600 micromol/L [1000 microgm/dl] – Hemodialysis > Peritoneal dialysis > Arteriovenous hemofiltration > exchange transfusion

8. Monitor for hypernatremia when using sodium benzoate and other sodium compounds

D) Inherited metabolic disorder - Reduced fasting tolerance

Prototype disorders: Medium chain acyl CoA dehydrogenase/ Long chain acyl CoA dehydrogenase deficiency

1) IV therapy with balanced glucose and electrolyte solution should be started promptly at one and a half to twice maintenance for correction of hypoglycemia and acidosis.

a. Blood glucose concentration should be kept above 80 mg/dl. Use a 10% dextrose IV solution 10-12 gm/kg/minute or more Glucose [10 g/kg/d = 7-10 mg/kg/min]

b. IV infiltrations or other IV interruptions must be remedied promptly. Even one hour without IV dextrose may result in neurologic sequelae. If patient is able to take orally 10-15% glucose polymer may be used orally or NG tube

c. Metabolic acidosis may require treatment with boluses of sodium bicarbonate at 1 - 2 mEq/kg IV.

2) The need to supply caloric requirements must take precedence over fluid balance. Diuretics should be used, as long as the child is not anuric, in lieu of reducing the IV rate if fluid overload is a concern. The IV rate should not be lowered because of mild to moderate hyperglycemia.

Elevations of blood glucose may occur as a physiological response to relative intracellular hypoglycemia, a common phenomenon in metabolic diseases.

If there is a need to control hyperglycemia, insulin at 0.02 to 0.05 units/kg/hr should be started and adjusted to maintain blood glucose between 100 and 150 mg/dl.

3) Do not administer IV lipids. Intralipid is contraindicated.

4) Labs should be sent for glucose, electrolytes, blood ammonia, CBC, BUN, creatinine, uric acid, LFTs, CPK, blood gas for pH, and urine for myoglobin. Heparinised plasma for carnitine (1 ml) and urine organic acids (15 - 20cc) should be collected, frozen, and sent STAT on dry ice to a laboratory.

5) A chest x-ray and Doppler echocardiography should be considered since

cardiomyopathy is associated with this condition.

6) Treatment for any triggering infection should be started as appropriate.

7) Because of potentially severe metabolic stress caused by fever, temperatures in excess of 37.8o C should be treated aggressively with acetaminophen, and if necessary, ibuprofen. Use a cooling blanket if necessary.

8) Carnitine should be supplemented at the usual dose orally if tolerated at 100 - 300mg/kg/day

9) When enteral feeds are started, they should be ordered every 3 - 4 hours. Diet limits the use of long chain fats to 15- 20% of total calories and recommends that MCT comprise 15- 20 % of the calories. Daily calorie counts should be conducted to closely monitor the intake

In Long-Chain 3-Hydroxyacyl-CoA Dehydrogenase (LCHAD) Deficiency, oral DHA supplementation has been tried with some

10) Patient should be continued on hydration therapy (1 1/2 times maintenance) until the CPK level begins to decrease significantly, creatinine normalizes, and gross myoglobinuria has resolved. Patient should also be clinically improved without significant myalgia.

E) Inherited metabolic disorders - Disturbed Energy Metabolism

Prototype disorders: Defects in Pyruvate dehydrogenase complex (PDHC), the Krebs's cycle and respiratory electron transport chain defects

Acute crisis can manifest as life threatening metabolic acidosis, ketoacidosis and lactic acidemia

1. Vigorous treatment of acid base balance

2. Patients with PDHC deficiency are glucose sensitive; glucose infusion not more than 2-3 mg/kg/min

3. Patients with Electron transport chain

(ETC) defects, glucose 10-15 mg/kg/min

4. Very high lactate levels may be lowered by dialysis or, by administration of Dichloroacetate: 15 - 200 mg/ kg/day - oral or intravenous

5. In patients with mitochondrial disease, cofactor replacement has been tried with varied success. Anecdotal reports of success with various cofactors have been reported. A single form of therapy cannot be recommended in all cases. A trial of the following drugs is worth considering

a. Biotin-in multiple carboxylase deficiency-proven role in most cases

b. Riboflavin-in some patients with multiple acyl CoA dehydrogenase deficiency: 100-300 mg/d

c. Co enzyme Q 10: Dose: 4.3 mg/kg/ day; range: 30-300 mg/day. Can be dissolved in vegetable oil and then added to food

d. Vitamin E

e. B Complex vitamins - Thiamine [300 mg/d], niacin, pyridoxine, vitamin C [5 mg/kg/d], folic acid, B 12, Pantothenic acid

f. If a measured deficiency of carnitine is found, L-carnitine supplementation to be given

6. Other supportive measures to reduce cerebral edema such as Mannitol may also be given

7. Actively search for precipitants of crisis such as infection and actively treat them.

IAP Awards – 2022

Life Time Achievements Awards

The Executive Board instituted “Life Time Achievements Awards” to be conferred on very senior members of IAP for their long association and contribution for promotion of aims & objects of the IAP. The Awardees for year 2023 are as follows:

East Zone	:	DR MOHINI MOHAN DAS
West Zone	:	DR BALDEV S PRAJAPATI
North Zone	:	DR AK DUTTA
South Zone	:	DR KM GANESSAN
Central Zone	:	DR. AJAY KALRA

Hon Surg Cmde Late Dr. Shantilal C. Sheth Oration to Dr Vaman Khadilkar

Our hearty congratulations to the following members on their election as Fellows of IAP 2022:

Member Name	State
DR SANJAY GOYAL	MADHYA PRADESH
PROF. WILLIAM J. KEENAN	USA
DR ATANU BHADRA	WEST BENGAL
DR JEETENDRA B GAVHANE	MAHARASHTRA
DR MADHUMITA NANDI	WEST BENGAL
DR KAILASH C TAMARIA	DELHI
DR SHARMILA B MUKHERJEE (BANERJEE)	DELHI

The Questions were set as per rule B of quiz guidelines .6 rounds with a total of 5 questions per round, 6th was a non-passing visual round.Direct question if correct would get 10 points ans correct pass question gets5 points.A total of 30 questions were there in main round.

Rapid fire was with 8 questions per set to a team . Total 40 questions were set . The correct answer gets 5 points per question, with no negative points for the wrong answer.

The timing was kept by the event management group.

The participants were welcomed at the venue with refreshments & lunch and provided with TA as per guidelines. The prize money would be disbursed in a week's time.

The quiz was well appreciated with respect to the quality of questions, question delivery, and time keeping.

All the questions were answered by at least one team. There were no controversial issues regarding any questions. References were given with each answer. At the end of each rounds there were questions for audience(with prizes!) also.

The winners of the quiz were :

They won Rs 1 Lakh as prize money.

The runners-upwere :

They won Rs 50000/- as prize money.

The participating teams were given certificates and a sum of Rs 10000/- each.

IAP PG Quiz National Coordinator

REPORT OF THE FINAL ROUND OF THE 35TH IAP PEDIATRIC QUIZ FOR UNDERGRADUATES 2023

IAP quiz for undergraduates is being held every year for the last 35 years. The process for the 35th IAP quiz for undergraduate students started from the month of July/ August 2022. The College rounds were held in respective colleges of the country. The college rounds were followed by the Divisional rounds and in some zones, State rounds were also held. Zonal rounds were held in respective zones in the month of November, December'2022, and February 2023.

The list of zonal winners is in tabulated form.

The National final round was held during the 30th IPA congress and 60th PEDICON at Mahatma Mandir Convention & Exhibition Centre Gandhinagar main convention Hall on 23/2/23 from 2.30 pm onwards after the National Final round of the Postgraduate Quiz... This important scientific activity was attended by more than 500 International as well as Indian delegates. This activity was presided over by Dr Upender, President of IAP. Dr. Bakul Parikh, Dr Santosh Soans, Dr G V Basavaraja were among the august gathering who witnessed the proceedings. Dr Vineet Saxena, HSG, IAP delivered the concluding address. Prof Ravinder K Gupta the National Quiz coordinator was the Quiz master. Dr. Riaz was the national quiz convenor. Dr. Kurshid and Dr. Manish Gupta assisted with the quiz activity.

There were 5 teams who qualified for the Final round. One team (Ms Shashi Kiran and Manisha Ranga from KIMS Telangana) representing the central zone could not attend owing to their university examinations. Hence the quiz competition was held among 4 teams only. There were 8 rounds including one visual and one rapid-fire round. The contest was very exciting. There was neck-to-neck competition till the end and the eventual winners were decided in the rapid-fire round only. Ashmita Jain & Devesh Dharmarajan from Seth Medical College, Mumbai (West Zone) were the winners with 93 points . Alan S Moses & S. Pragadheesh from Madurai Medical College (South Zone) were runners-up with 85 points . Srijani Chatterjee & Sreenanda Das from Medical College, Kolkata (East Zone), and Keerthna K & Pulkit Bansal from AIIMS, Delhi (North Zone) were other participants had a score of 75 points each .

Overall, the whole event received a very good response from all the colleges all over India. Coordinators at every level (college, Division, state, and Zona) contributed wholeheartedly to make it an immensely successful and well-attended event at every level. IAP must be complimented for encouraging undergraduates in participating in such types of scientific activities. FOR THE FIRST TIME IN HISTORY the zonal winners are also given prize money.

During the Valedictory function, the winning team received a cheque amount of rupees one lac rupees from the dignitaries including Dr Naveen Thacker, IPA president, Dr Bakul Parikh, Dr Upender, Dr GV Basavraja, Dr. Santosh Soans, Dr Vineet Saxena , Dr Chetan Trivedi, Dr. Ravinder K Gupta and Senior Executives of Sun Pharmaceuticals. The runners' team received a cheque amount of 50 thousand while other participating teams received cheques of ten thousand each. The prize money was sponsored by Sun Pharmaceuticals.

REPORT OF 30TH INTERNATIONAL PEDIATRIC ASSOCIATION (IPA) CONGRESS AND 60TH INDIAN ACADEMY OF PEDIATRICS PEDICON 2023

The 30th International Pediatric Association (IPA) Congress and 60th Annual Conference of the Indian Academy of Pediatrics (IAP) was held from February 19th to 23rd, 2023, at the Mahatma Mandir Convention and Exhibition Centre in Gandhinagar, Gujarat, India. This event brought together pediatricians, researchers, and healthcare professionals worldwide to discuss the latest advancements in pediatric care, research, and education.

The conference was attended by more than 6,500 delegates, including pediatricians, nurses, allied health professionals, researchers, and students, from over 100 different countries who participated in this mega event – 30th IPA congress organised in India after a span of almost 46 years to India.

The conference featured several keynote lectures, plenary sessions, symposiums, panel discussions, debates, oral paper presentations, poster presentations and pre-conference workshops covering a wide range of topics related to child health, including neonatology, infectious diseases, adolescent health, neurodevelopmental disorders, pediatric emergencies, etc. Along with the high-quality academic feast, there was a perfect blend of cultural and extracurricular activities. RACE 7 & Diamond Jubilee Pediatric League 2023.

Shri Bhupendra Patel, Hon. Chief Minister of Gujarat, inaugurated the conference, and Shri Mansukh Mandaviya, Hon. Health Minister, Government of India, gave a virtual address at the inauguration. The unique cultural event preceded the inauguration ceremony – UNITED COLOURS OF INDIA, where different dance forms representing different states of India were performed by our own pediatricians & IAP members like Bihu, Kathak, Ghummar, Kashmiri, Bhangra, Lavni & Garbas, ended by patriotic song Indiawale having all dignitaries on the stage with Indian flags in their hands.

The theme for the conference was “Quality Care for Every Child Everywhere.” This theme emphasized the importance of providing high-quality healthcare services to every child, regardless of their geographic location or socio-economic background. The conference aimed to promote the adoption of evidence-based practices, the strengthening of health systems, and the development of policies that prioritize child health and development.

The conference was graced by the presence of over 800 distinguished guests and renowned speakers, Editors, as well as representatives from Govt. of India MOHFW and Govt Authorities from other countries, and senior health authorities, including Dr Joy Lawn, Professor, London School of Hygiene & Tropical Medicine, United Kingdom; Dr Ephrem Lemango, Associate Director Health, Chief of Immunization, UNICEF Headquarters, USA; Dr Esther Lau, Editor-in-Chief, The Lancet Child & Adolescent Health, United Kingdom; Dr Nick Brown, Editor-in-Chief, Archives Disease of Childhood, Sweden; Dr Sumita Ghosh, Commissioner Child Health, Government of India, and Shri Manoj Aggarwal, Additional Chief Secretary, Health & Family Welfare, Government of Gujarat. The speakers emphasized the need for collaborative efforts to address the global burden of childhood diseases and to promote child health and development.

The plenary sessions covered important topics for global child health and included Reaching Every Child, Meet the Editors, Growth Charts, Neonatal Survival, Technology in Child Healthcare, Immunization: Zero Dose Strategy, Redesigning School-Aged Child and Adolescent Health, and Effect

of Climate Change on Child Health. The speakers highlighted worldwide strategies and initiatives to improve child health, especially in low-income settings.

The conference also featured several workshops and hands-on training sessions on a variety of topics, including neonatal resuscitation, pediatric advanced life support, and pediatric ultrasound. These sessions provided practical training and skills development opportunities for healthcare professionals, especially those working in low-resource settings. Almost 700 scientific papers & poster entries came from PG students & residents as well as pediatricians. Out of which, 80 were selected for oral paper presentation & rest for E posters.

One of the highlights of the conference were the sessions on Vaccinology, which featured presentations by leading experts on the latest developments in vaccine research and development. The speakers discussed the challenges and opportunities in vaccine development, the role of vaccines in disease prevention and control, and the importance of vaccine hesitancy and vaccine equity.

The sessions on Pediatric Emergencies focused on the management of pediatric emergencies, including natural disasters, conflicts, and humanitarian crises. The speakers discussed the key principles of emergency preparedness and response, the challenges in delivering healthcare in resource-limited settings, and the importance of addressing the psychosocial needs of children and families affected by emergencies.

The Infectious Diseases sessions discussed the latest updates on a wide range of diseases that included HIV, Tuberculosis, Leprosy, Brucella, Leptospirosis, Covid19, Dengue, etc. The sessions also highlighted the rational use of antibiotics and ways to overcome antibiotic resistance.

The conference featured many innovations, such as promoting the “Go Green” mission. Not a single brochure was printed to promote the conference. All scientific literature and session details were made available on a mobile app designed especially for the conference. Even the delegate badges were prepared using eco-sensitive, non-tearable paper. The industry exhibition was well made, with over 70 exhibitors displaying their latest services and offerings. For the first time, an innovation hub was developed, having select companies and development partners displaying unique innovations in their areas of operations.

Various IAP Members were felicitated for life time achievement awards, FIAP & book release. Many state & city branches were given best branch awards in various categories. As a part of a charity activity from IPAPEDICON, we distributed freshly prepared food packets to 500 street children of nearby slums during all 5 days of the conference.

Delegates enjoyed entertainment evenings with a gala grand banquet dinner on the 21st & 22nd of February. Legendary singer Shankar Mahadevan performed with his son Siddharth on the 21st February evening & Indian idol fame & sensational yuva singers Pawandeep & Arunita Kanjilal made the evening memorable with melodious hindi songs & music on 22nd February in Hotel Leela lawns.

The conference demonstrated the commitment of the global pediatric community to advancing child health and development. It highlighted the need for continued efforts to address the challenges facing children and families worldwide. Overall, the conference provided an excellent platform for knowledge sharing, networking, and collaboration among pediatricians and healthcare professionals worldwide.

Kind Regards,

60th IAP Pedicon & 30th IPA Congress 2023 Organising Committee

3. **'Jagruk Palak, Sudrudh Balak' Abhiyan will be implemented in Maharashtra from 9th Feb 2023 to 9th March**

Under this Abhiyan, all children under 18 years will be screened and treated. This Abhiyan will run for one month. Navi Mumbai Municipal corporation has appealed to all Paediatricians in Navi Mumbai to help in this humongous job by dedicating some time in this one month to help screen children. We were allotted a few UHP's and we have to examine children aged 6-18 years falling under this UHP along with NMMC doctors and staff and note down the examination findings in the School screening card. Committed to examine more than 30000 children all over Navi Mumbai in one month time, **Dr Jeetendra Gavhane, Dr Prashant Weekay, Dr Anjali Otiv, Dr Amardeep Garad, Dr Satish Sahane, Dr Gargi Bangar** contributed by giving time and screening children.

4. To celebrate **Deworming day**, IAP Navi Mumbai president **Dr Satish Sahane** and **EB member Dr Suhas Kharche** conducted mass deworming of Tanda and Nomadic tribal children. They also distributed new clothes to children, gave 10 kg rice per hut, snacks and multivitamins. **Hygiene awareness talk**, health check-up and distributing Deworming medicines by **Dr Satish Sahane and Dr Pankaj Saste** at **Shri Satya Sai Sanjeevani hospital**,
